Full Stack Developer (Projects) with hands-on experience building full-stack web applications using React.js, Node.js, Express.js, PostgreSQL, REST APIs, and JWT authentication. Passionate about building scalable software, solving real-world problems, and continuously learning modern software engineering technologies.

EDUCATION

B.Tech Computer Science | SVKM's NMIMS MPSTME, Shirpur

Expected Graduation: 2028

Relevant Coursework: Data Structures & Algorithms, OOP, DBMS, Computer Networks, Design & Analysis of Algorithms

PROJECTS

Career Copilot – AI-Powered Career Intelligence Platform | (<https://career-copilot-frontend.onrender.com> - Live Demo), (<https://github.com/ashmita-dev/career-copilot>) | React.js, Tailwind CSS, Node.js, PostgreSQL, JWT, GitHub API

- Designed, developed, and deployed a responsive full-stack career intelligence platform using 15+ REST APIs and 8+ PostgreSQL tables to analyze student skills, identify career gaps, and generate personalized learning roadmaps.
- Built secure JWT authentication, protected routes, profile management, and reusable backend modules following clean and maintainable coding practices.
- Integrated the GitHub REST API to analyze repositories, evaluate technical portfolios, and generate career-readiness insights while managing development using Git and GitHub.

Event Management Portal | HTML, CSS, JavaScript, AngularJS, Node.js, Express.js, SQL Server

- Built a role-based event management platform supporting event creation, registrations, tracking, and administrative workflows through RESTful backend services.
- Built Version 1 using AngularJS and SQL Server; currently rebuilding with React.js, Tailwind CSS, and PostgreSQL to improve scalability and user experience. (<https://github.com/ashmita-dev/event-management-portal>)

SneakerDB – Sneaker E-Commerce Platform | HTML, CSS, JavaScript, Node.js, Express.js, SQL Server

- Built a full-stack sneaker e-commerce platform featuring authentication, inventory, order processing, payments, shipment tracking, and customer reviews.
- Designed a normalized SQL Server database with **12 relational tables**, developed **19+ REST APIs**, and implemented **40+ SQL queries** supporting core business workflows. (<https://github.com/ashmita-dev/SneakerDB>)

SKILLS

Languages: Java, JavaScript, SQL, Python, C++ | Concepts: DSA, OOP, DBMS, CN, Design & Analysis of Algorithms

Frontend: React, HTML5, CSS3, Tailwind CSS | Backend: Node.js, Express.js, REST APIs, JWT Authentication

Databases: PostgreSQL, SQL Server | Tools: Git, GitHub, Postman, VS Code, Render

ACHIEVEMENTS

Second Prize – Python Mini Project Competition.
Participated in Yugantar 2.0 Inter-Institute Hackathon (SIH 2025 Round-1 Selection).

CERTIFICATIONS

- JP Morgan Chase Software Engineering Virtual Experience Program (Forage)
- Microsoft Learn Cloud Computing Certifications & Badges
